---

Above is Mike H on his Shay during the Sept 19, 2020 train run. Mike converted the loco to be propane fired which provides plenty of heat to keep steam pressure up. Mike carried several car loads of passengers during the day.
Above is Larry W driving 7695 on the Sept 5th run day. Note every other passenger car is empty to achieve social distancing. Scott L is conductor way in back. At right is young CPR&SS member Keith C with a baby squirrel that climbed up his leg. Four babies came down a tree by the loading station and were unafraid of people.

Above are (L-R) Jim M, Mike H, Spencer F, John B) on the Sept 19 run day. John B made the Garrett that he and his grandson are firing up. In back, Mike is firing up his Shay.

At left is Mark F running club loco 7695 with passengers on every other car and with Jim M as the conductor. We had over 200 riders this day. We are not using ride tokens due to Covid but are accepting donations at the loading station.
The Oct CPR&SS club meeting is scheduled for Saturday, Oct 03rd starting at 10 AM.

The CPR&SS meeting day was changed to the FIRST Saturday in October to be on the train run day. This was a one-time change.

Next year, meetings are planned to be on the second Saturday of each month.

At the track and meeting, you should wear a mask, practice social distancing, and comply with Federal, State, Local, and Carillon Park coronavirus regulations and guidance.

Sept 1 work day. Top Left: Will G cutting the stump remaining after this Ash tree was cut down a few years ago. The stump was 4 or 5 inches above ground and was a tripping hazard particularly during the night time runs at Christmas. Above, members Jim H, John L, and Will G dug down around the stump then used the chainsaw and a pry bar to remove chunks. At left, ten buckets of dirt were dumped in the hole.
Below is club loco 615 now in Pennsy colors along with it’s matching engineers car. Bob S built the engineer’s car and refurbished and repainted the loco’s shell. Apparently Pennsy used 4 digit numbers so Bob just added a “9” in front of “615”. Also, we now have an “A” unit and a “B” unit – engineers car is 9615B. Thanks for the work Bob – looks great.

Above are Jim H and Jim E (nailing) working on the loco storage unit made from 7695’s shipping crate. Plans are for it to hold both locos now in the tunnel which are weathering badly there. Sides, end doors, and a gable roof to be added soon.
